

As a flight attendant, I am begging you to PLEASE don't approve cell phone use during flight! We already have a problem getting passengers to pay attention during safety announcements, hearing us during service, handling passenger grievances between each other such as body odor, falling into each other's "area", reclining the seat too far back, seat back "bumping", etc. To add another major annoyance to other passengers and to us is so unnecessary. NOTHING is THAT important that it can't wait for an hour or a few hours. Passenger's nerves are already frayed due to lines at security, tight seating quarters on the plane, stress from life! PLEASE don't add another stress factor to them & to us!!
